**Thermo Fisher Scientific announces Stem Cell Alliance with
Cellular Engineering Technologies**

LOGAN, Utah, USA (August 14, 2007) — Thermo Fisher Scientific Inc., the world leader in serving science, announced today a partnership with Cellular Engineering Technologies (CET) of Coralville, Iowa.

The alliance will cover the production and marketing of human non-embryonic stem cells, growth media used to grow these cells and differentiation media used to convert the stem cells into other types of human cells. This partnership was formed in response to growing demand among researchers for human non-embryonic stem cells, which have shown great promise as a potential treatment for such conditions as Diabetes, Cardiovascular Failure and Parkinson's disease, among many others.

This alliance augments the recent launch of Thermo Scientific HyClone AdvanceSTEM™ line of stem cell culture products, which has been developed specifically for applications in stem cell research. The line comprises numerous products designed to support a wide range of applications such as the expansion and maintenance of undifferentiated murine embryonic and human adult mesenchymal stem cells to the directed differentiation of mesenchymal stem cells into adipocytes, chondrocytes, and osteocytes.

About Cellular Engineering Technologies

CET is a biotechnology tissue engineering company, which combines engineering with life science for preclinical drug discover. CET specializes in stem cells obtained from human non-embryonic sources, such as fat collected during liposuction procedures, umbilical cords, umbilical cord blood, and placentas collected after full-term deliveries. The company was founded by Dr. Alan Moy, CEO, in 2000 and is Iowa's premier non-embryonic stem cell company. Visit www.celleng-tech.com.

About Thermo Fisher Scientific

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, enabling our customers to make the world healthier, cleaner and safer. With an annual revenue rate of more than \$9 billion, we employ 30,000 people and serve over 350,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings. Serving customers through two premier brands, Thermo Scientific and Fisher Scientific, we help solve analytical challenges from routine testing to complex research and discovery. Thermo Scientific offers customers a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory equipment, chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
